Overview

CompQsoft is a customer-centric digital platform and IT services company. We empower organizations across industries to leverage our four core IT competencies: Software Development, System Engineering, Information Assurance & Cybersecurity, and Unified Capabilities. These competencies are instrumental in driving innovation, advancing digitization, and achieving desired business transformations.

For over 25 years, CompQsoft has been assisting clients in maximizing their technological investments and achieving superior business outcomes. Headquartered in Leesburg, VA, we operate engineering centers across the country. As a full-service IT integrator, we specialize in ERP Solutions, IV-V Testing, end-to-end IT Service Management (ITSM), NOC/SOC operations, networking, and software engineering. Our extensive customer base includes the Department of Defense and Federal Civilian Agencies, covering all Military Departments.

We maintain a TS Facility Clearance Level and possess a DCAA-approved accounting system along with a certified procurement system. Our strategic partnerships with industry leaders such as Microsoft, AWS, Oracle, SolarWinds, SAP, ServiceNow, Splunk, Databricks, Red Hat, and Juniper Networks provide us with unparalleled access to OEM expertise and emerging capabilities.

CompQsoft's people, technologies, and services empower enterprises to deploy efficiently, learn quickly, grow intelligently, and enhance overall experiences for employees, partners, and clients.

Technical Capabilities:
- SAP, Oracle, and Peoplesoft Implementations
- Data Cleansing/Migration
- Multi-Domain Data Analytics
- IT Infrastructure Integration and Support
- Cybersecurity Engineering
- Cloud Migration Services
- Software Design and Development
- Independent Test and Evaluation
- Training Development and Delivery
- Unified Capabilities

Functional Expertise:
- IT Engineering and NOC / SOC Operations
- DoD Supply Chain Management
- DoD Financial/Funds Management
- ERP Pay and Personnel

Contract Vehicles (Prime IDIQ):
- DISA ENCORE III LB
- GSA 70 Schedule SB, SDB, HubZone
- NITAAC CIO-SP3 SB, Hub zone
- NAVY SEAPORT NxG SB
- OASIS+ LB
- FBI ITSSS LB
- DLA JETS 2.0 LB

Appraisals and Certifications:
- CMMI-DEV and SVC Level 3
- ISO 9001:2015
- ISO 27001:2022
- ISO 20000-1:2018
- Microsoft Solutions Partner

Prime Contracts

United States Space Force
CompQsoft provides IT support services for the operation, maintenance, and logistics of Peterson and Schriever Space Force Bases in Colorado Spring, including future requirements, emerging technologies, system growth, new and upgraded equipment, and emergency Giant Voice notifications.

Naval Sea Systems Command
CompQsoft provides Application Development, Maintenance, Configuration Management, NMCI/Microsoft 365 Flank Speed Support, Help Desk Support, Systems Operational & Sustainment Support, Network Operations, Sustainment & Configuration Support, and Information Assurance/Cybersecurity.

United States Coast Guard
CompQsoft provides USCG with information technology and cybersecurity support services and operational mission support for enterprise aviation applications and multiple PIT systems.

Defense Information Systems Agency
CompQsoft provides Unified Capability procurement and installation support, asset and inventory management, software development, helpdesk, operations, systems engineering, enterprise architecture, and program management support for the Pentagon, Mark Center and Joint Staff.

Defense Information Systems Agency
CompQsoft provides Defense Information Systems Network (DISN) Engineering, Cybersecurity Hardening and Evaluation, Technical Documentation, Software Development, and Test and Evaluation support for PEO-Transport.

Defense Commissary Agency
CompQsoft provides IT services including data network, enterprise 24/7/365 NOC/SOC operations, computer network defense, telephony/voice and convergent technology, cybersecurity and IA, and circuit management.

Defense Commissary Agency
CompQsoft provides a cloud-based Financial Information Management (FIM) module using Oracle Fusion Software as a Service (SaaS) to meet DeCA's financial and contracting requirements, including migrating business systems to the Oracle Cloud.

Enterprise Resource Planning

Air Force Integrated Personnel and Pay System (AFIPPS)
AFIPPS is a web-enabled, COTS-based, single authoritative record for AF personnel and pay, integrating the Oracle E-Business Suite with the AF Military Personnel Data System and military leave and pay processes into a single system. CompQsoft's engineers and functional SMEs support the Oracle Payroll Module with configuration management, software code migration, release deployments, and recovery operations.

Army General Fund Enterprise Business System (GFEBS-SA)
GFEBS is the Army's web-based financial management system, standardizing business processes and transactional input across the Army. CompQsoft supports the GFEBS-Sensitive Activities system operating on the high side, providing subject matter expertise in full cost reporting and audit trail engineering.

Navy Integrated Personnel and Pay System (IPPS-N)
CompQsoft supports Navy IPPS-N ERP by providing technical, functional, and business requirements satisfying Navy personnel and pay requirements. CompQsoft uses advanced benchmarking methodologies and ORSA optimization modeling to assist in requirements analysis, cost-benefit analysis, and process re-engineering, delivering most viable recommendations and options for fielding.
